

Paw Print Gazzette

HOT OFF THE PRESSES

Air Temperature

77°
86°
87°

Asphalt Temperature

125°
135°
143°

At 125° Skin Destruction begins to occur after 60 seconds. Always check the asphalt prior to taking your pet out on it. If it's too hot for your bare feet, it's too hot for your dog.

HOT PAVEMENT, NO DOGS ALLOWED

June is Full of Summer Fun for You and Your Pet

- June 3 - 9: Pet Appreciation Week

Hot Pavement, Hot Vehicles

It's Going to be a Hot Summer, Prepare for Your Pets Needs

Don't go out for walks once it gets past 80 degrees. Especially on dark pavement, but gravel trails get just as hot under the New Mexico sun.

Make sure that you have plenty of water for you and your pet.

Don't leave your pet in the car. If your pet can't accompany you during an outing, they need to be left at home or under care. Hot cars are deadly and we have already seen temperatures this month that would be dangerous for animals and children.

WE RECOMMEND REGULAR USE OF HEARTWORM MEDICATION

Mosquito Alert

Heartworm, Brought to you by the Mosquito (*Culicidae*)

A little bit of rain can turn into a lot of mosquitos and with them Heartworms. Worms grow over 7 months and usually come in multitudes. The worms begin with an incubation period inside the mosquito. They carry the larvae and deliver it to **the host, your cat or dog!** They can grow up to 12 inches and dogs can be infected with as many as 250 of them. It's nasty business for your dog or cat! This is why we recommend **regular testing** and most importantly, preventive medication.

Ask About K-Laser

For treatment of pain, itching, inflammation.

Get into motion with Laser Therapy.

Help your pet to bounce back from injury and pain with the one tool that knows no bounds.
