HEARTWORM AWARENESS CONTINUES

No Foolin' Around

Buy Heartworm Medication

It's sometimes hard to imagine that "an ounce of prevention"...really is worth it. In this case it is. Heart worms are highly invasive and the treatment, once afflicted, adds up quickly.

For the cost of what adds up to be 7 years worth of medication, the treatment is more than your dog and

your wallet want to go through. The reality is that you love your pet and you don't want to see them go through a case of Heartworm. Call to schedule a Heartworm test. *See our offer to receive 1/2 OFF your next test.*

Brought to you by the Mosquito (*Culicidae*)

Worms grow over 7 months and usually come in multitudes. The worms begin with an incubation period inside the mosquito. They carry the larvae and deliver it to **the host, your cat or dog!** They can grow up to 12 inches and dogs can be infected with as many as 250 of them. It's nasty business for your dog or cat! This is why we recommend **regular testing** and most importantly, preventive medication.

Heartgard[®] Plus

PROTECTION AGAINST
HEARTWORM DISEASE IN A
MONTHLY REAL-BEEF CHEWABLE
THAT DOGS LOVE.
