HOT CAR ALERT - KEEP PETS COOL

505.275.3647

Welcome to TLC PET Hospital - Visit our website at tlcpethospital.net Ask about our pet boarding options when your kitty or dog needs a place to stay during the summer.

Memorial Day

May 29

OFFICES CLOSED

JUNE is American Humane's Adopt-a-Cat Month®

Thinking of adopting a new Animal? A little preparation can ease a lot of tension when introducing a cat into your home. If there are other pets in the house, make sure your new recruit has a safe quiet place to get used to the smells and sounds of their new place. Slowly introduce their new roommates.

Pet Appreciation Week

June 4-10

First full week in June

World Pet Memorial Day

June 11

Second Sunday in June

Take Your Dog to Work Day

June 23

Heartworm Alert Remains From Wet Spring

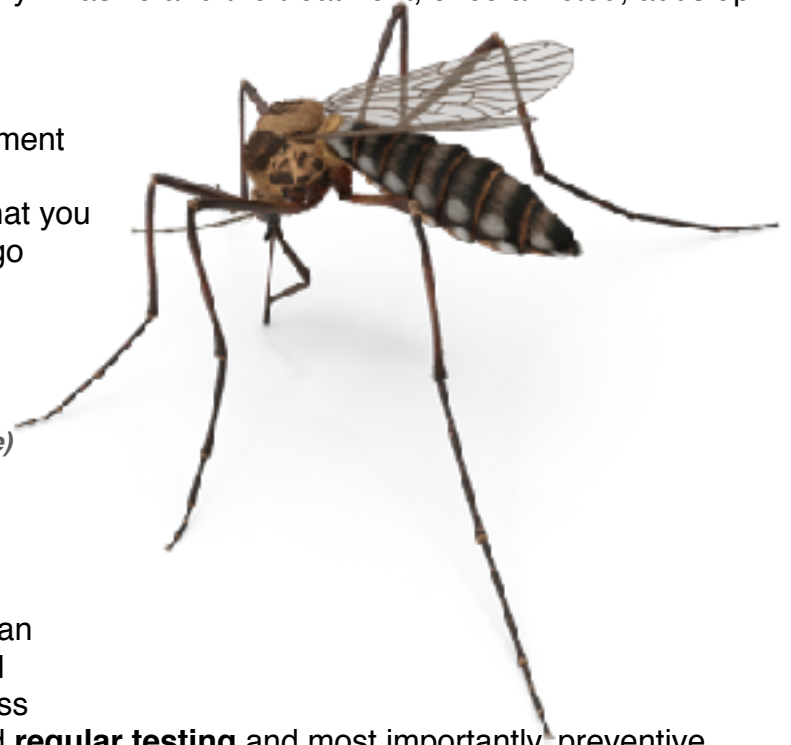

Buy Heartworm Medication to prevent

It's sometimes hard to imagine that "an ounce of prevention"...really is worth it. In this case it is. Heart worms are highly invasive and the treatment, once afflicted, adds up quickly.

For the cost of what adds up to be 7 years worth of medication, the treatment is more than your dog and your wallet want to go through. The reality is that you love your pet and you don't want to see them go through a case of Heartworm. Call to schedule a Heartworm test. *See our offer to receive 1/2 OFF your next test.*

Brought to you by the Mosquito (*Culicidae*)

Worms grow over 7 months and usually come in multitudes. The worms begin with an incubation period inside the mosquito. They carry the larvae and deliver it to **the host, your cat or dog!** They can grow up to 12 inches and dogs can be infected with as many as 250 of them. It's nasty business for your dog or cat! This is why we recommend **regular testing** and most importantly, preventive medication.

PREPARING FOR A NEW CAT

Before You Bring Your Cat Home:

Cats are territorial, and coming into a new home leaves them feeling really uneasy. There's all that unexplored space, and who knows what may lurk there. Do him a favor and provide a small area to call his own for the first few days or weeks. Furnish the room with cat amenities, such as food, water and a litter box. You'll want to spend time with your cat, so make sure there's a comfortable place for you to sit as well.

Fill a litter box with one or two inches of litter and place it in his room where he can use it undisturbed. Set up a feeding station with food and water bowls. Locate it away from the litter box.

Finally, set up your first visit with the vet. Read more at tlcpethospital.net
